RESPECT YOURSELF...AND OTHERS

Keep your self respect and keep construction workers respected by others. Construction jobsites can be anywhere. Schools, highways, bridges, warehouses department stores and even churches need work done throughout the year. The public is always around and watching. As a construction workers, you should be proud of your profession and expect your fellow workers to do the same.

Many times some men will make unwanted or rude remarks. Sometimes they whistle or do other things that can degrade women. These guys don't belong on your jobsite. Making cat calls or suggestive signs or words is stupid. The person could be your mother, daughter, sister or even your wife. You would not want that type of degrading expression by some punk or jerk heard by any women. Keep your own self respect and tell other workers to do the same.

Such behavior is not only rude, it can be dangerous. If you are not paying attention to what you're doing, a fatality or injury could occur simply because you couldn't keep your eyes on your job.

Remember, this is the United States of America, and here we treat all women with the respect we would show our mothers. Let's be proud, let's be courteous. It's not an OSHA regulation, but it's an American tradition.
