

Company _____ Location _____ Date _____

Vol 27 - No 44 CAVE-IN ACCIDENT

INCIDENT DESCRIPTION:

A 25 year old vice president was fatally injured when he was struck by falling loose material while he worked adjacent to a 20 to 25 foot vertical high wall. The victim and his co-workers had not scaled the loose material from the wall. Failure to wear a hard hat contributed to the severity of the injury. Accidents happen when we least expect for if we knew they were coming we would be prepared. So be prepared all the time!

SAFETY RECOMMENDATIONS:

1. All personnel should wear hard hats whenever there is a danger of falling material.
2. Quarry walls, banks, and slopes should be scaled or supported before workers are allowed in the area.
