**Vol 27 - No 37**

**SDS SHEETS**

About 32 million workers are potentially exposed to one or more chemical hazards. There are an estimated 575,000 existing chemical products and hundreds of new ones are being developed annually. This poses a serious problem for exposure to workers and their employers.

Chemical manufacturers and importers must develop a Safety Data Sheet or SDS for each hazardous chemical they produce or import. Distributors must also ensure that downstream employers are similarly provided an SDS.

Employers responsibilities are:

1. Identify and list hazardous chemicals in their work place.
2. Obtain SDS's and labels for each hazardous chemical.
3. Develop and implement a written Haz Com Program.
4. Communicate hazard information to their employees through labels, SDS's, & formal training programs.
