Vol 27 - No 34

SECURING LOOSE ITEMS

Loose items inside the cab or on the floor of any work vehicle can be a distraction. At worse, items could get stuck under a peddle causing loss of control of heavy equipment or a company vehicle resulting in an accident.

A good housekeeping practice is to secure all items inside the cab, that way reducing the chances of any distractions while operating or driving. Fire extinguishers should be mounted to prevent any accidental discharge and to make locating them in case of a fire emergency.

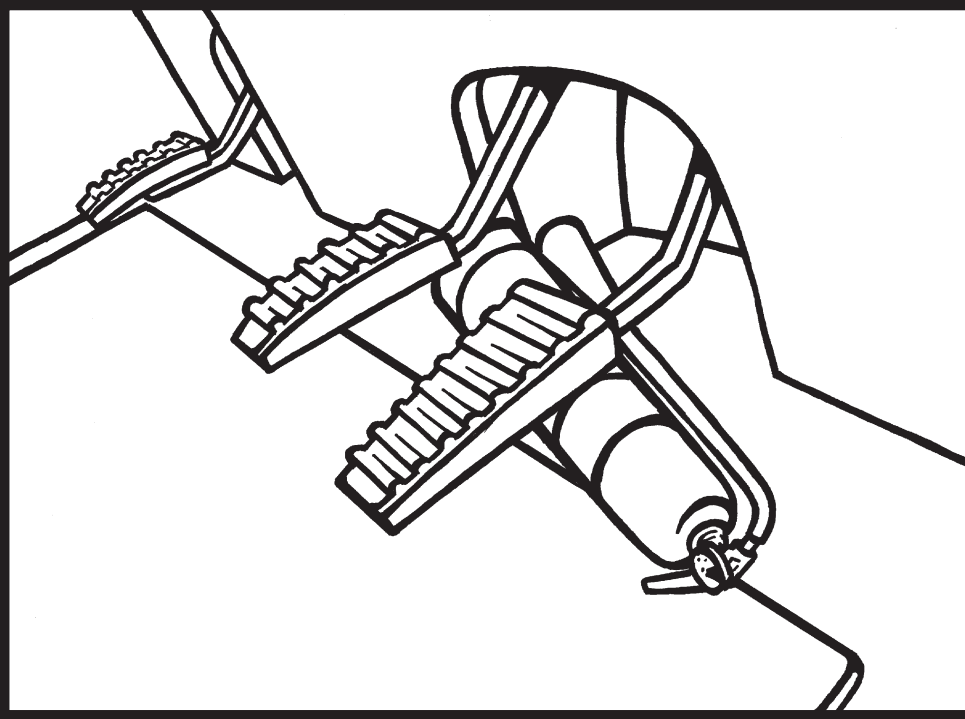

1926.601(b)(7) Tools and materials in the cab of heavy equipment shall be secured to prevent movement when transported in the same compartment with the employee.
