

Company _____ Location _____ Date _____

Vol 27 - No 49 CELLULAR PHONES

Cellular phone use has increased dramatically during the past few years. The price of phones, airtime and accessories is very affordable due to increased competition.

Cell phone use in the construction industry is very convenient. Supervisors can change concrete pours if needed, report emergencies, call for help, advise management of any situation that may arise. The uses for a cell phone are endless. Remember to always be aware of your surrounding while using your cell phone on a job site. It is easy to get distracted by a call and fall victim to a hazard that you might have seen if you were not preoccupied.

One must consider the hazards of using a cell phone while driving. Here are a few suggestions to minimize the hazard:

1. Always buckle up.
2. Limit cell phone use to necessary calls.
3. Wait to dial until you stop or pull over.
4. If your conversation is stressful or emotional, pull off the road.
5. If hazardous driving conditions arise, hang up.
6. Position your phone within easy reach.
7. Use hands-free kits if possible.
8. Dial numbers in short sequence while you are in motion.

Cell phones have improved safety on the phone and allow greater quicker access for emergency help. These suggestions will help minimize the hazards associated with using your cell phone.
