

Company _____ Location _____ Date _____

Vol 28 - No 15 FORLIFT SAFETY

Here are a few reminders regarding using forklifts for lifting personnel.

1. Operator must be trained to operate equipment safely.
2. Only an approved personnel platform is to be used with appropriate handrails, mid rails, toe boards and protective hand guards.
3. The personnel platform must be secured or fastened in such a way to prevent accidental slippage of the platform from the forks. (For example: bolts or chains)
4. Using wooden pallets as platforms are not approved and extremely dangerous.
5. Fall protection must be worn while working in personnel platform.
6. Only one person is allowed in platform unless otherwise approved and engineered.
7. Do not ride in personnel platform when forklift is traveling.
8. Do not use ladders inside or on the personnel platform for additional height.
9. Forklift must not be unattended while personnel are elevated.
10. Keep hands inside platform when platform is being raised or lowered.
11. Do not throw things down from elevated platforms.
12. Be aware of electrical lines in the area and as you are being elevated.
