HAZARD COMMUNICATION - SAFETY DATA SHEETS

Safety Data Sheets (SDS) contain useful information for chemical products used in the workplace. The potential health effects, hazards of its use, and the chemical content are listed on the SDS.

Many of the recommendations listed on a Safety Data Sheet are common sense. This information is very important to enable you to use and handle the chemical properly. Always follow the manufacturer's recommended procedures for use as described on the container label. If you have any questions or do not understand the information on a SDS, contact your supervisor for assistance.

Remember that it is your responsibility to your family, fellow employees and yourself to understand the proper procedures associated with working with chemicals in the workplace.

CFR 1910.1200(b)
HAZARD COMMUNICATION
"Scope and application."

(3)(ii) Employers shall maintain any safety data sheets that are received with incoming shipments of hazardous chemicals, and ensure that they are readily accessible during each work shift to laboratory employees when they are in their work areas;

(4)(ii) Employers shall maintain copies of any safety data sheets that are received with incoming shipments of the sealed containers of hazardous chemicals, shall obtain a safety data sheet as soon as possible for sealed containers of hazardous chemicals received without a safety data sheet if an employee requests the safety data sheet, and shall ensure that the safety data sheets are readily accessible during each work shift to employees when they are in their work area(s)
